

## Apple iPhone Configuration Profile Install Tutorial

This tutorial will show how to install the Apple iPhone configuration profile that the Health Science Center Office of information Technology has prepared for HSC faculty, staff and students.

Importing this profile into your iPhone will enter settings to sync your HSC Exchange email account (mail, contacts, and calendar), connect your iPhone to the "tamhsc" wireless network, and also setup a VPN. (Please backup all of your data before performing this install)

**NOTE: This is only for the original iPhone or the iPhone 3G with the 2.0 firmware installed**

**CAUTION: When syncing, ALL of your contacts on your phone will be replaced by the contacts within your Exchange profile. We recommend you backup and transfer ALL of your contacts into your Exchange profile before performing this install**

1. On your iPhone navigate to "**it.tamhsc.edu**"
2. Under "**Services**" select "**email**"
3. On the next page select "**Mobile Email**"
4. Then select "**Apple iPhone**"
5. Click on the link "**iPhone 2.0 Config File**"

6. The following screen will appear

7. Select **“Install”**, you will get a popup like below, select **“Install Now”**

8. You will then get a series of prompts to enter your email address, password, and Domain account. Please remember this is asking for your **HSC Exchange**

## Account information.
